ISO/IEC 17025:2017 Accredited

Precision Acoustics gains ISO/IEC 17025:2017 accreditation for calibrations between 1-30 MHz

We are pleased to announce that Precision Acoustics Ltd has received an accreditation for ISO/IEC 17025:2017 (General requirements for the competence of testing and calibration laboratories) from the United Kingdom Accreditation Service (UKAS).

The newly received accreditation applies to all of our 1-20 MHz and 1-30 MHz in-house hydrophone calibrations and now means that the free calibration that is included as standard with all new needle hydrophones will now be performed in accordance with ISO/IEC 17025:2017.

We will be passing on the benefits of this additional accreditation to our customers and our calibration lead times will remain unchanged. Remember once you have placed your order with our Office Team you are then able to [book a date for your calibration online](#) in order to reduce the time you are without your hydrophone.

most demanding and exacting international standards and users can have the highest level of confidence in the data supplied with their devices.
